DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

2. Claims 21-28 are rejected under 35 U.S.C. 102(e) as being anticipated by **August et al (6,389,055)**.

As to claims 21 **August et al** (hereinafter **August**) a device for displaying information comprising: a display means (see, figs. 1,4,5 (110), col.2, lines 23-35, col.3, lines 14-20); activation means (fig.1 (26))/receiving an acoustically propagated signal (fig.1 (20)) coupled to said display means (fig.1 (110)) for causing said display means to display predefined information upon reception of predefined acoustically propagated data broadcast by a commercial broadcast source (fig.1 (19), (20), col.2, lines 22-34, col.4, lines 45-57), wherein said commercial broadcast source comprises one of a commercial radio broadcaster and a commercial television broadcaster (col.2, the last 2 lines – col. 3 lines 10, lines 28-32, col.4, lines 45-57 col.5, lines 35-43).

As to claim 22, **August** also discloses said acoustic signal is digitally modulated (col.3, lines 39-43).

As to claims 23,27,28 **August** teaches programming said predefined data and said predefined information [an advertisement/a message] (col.2, lines 31-34,col.4, lines 45-57).

As to claim 24, **August** discloses that the display is LCD (col.2, lines 23-29, col.6, lines 42-43).

As to claim 25, **August** also teaches said activation means is an application specific integrates circuit (see, fig.1 (26)).

In regard to claim 26, **August** discloses said device further includes a microphone (fig.1 (14)). **August** did not expressly detail an analog to digital interface, a programmable digital processor and a battery. However, one skilled in the art would have recognized that the device of **August** would have to have an analog to digital interface, a programmable digital processor since the decoder (26) only receive a digital data (see, fig.1 (26)), col.3, lines 39-43).

Allowable Subject Matter

3. Claims 29-35 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The cited prior arts [**August, Albert et al**] has failed to teach Applicant's claimed invention "***comparing said received acoustically propagated signal with a predefined signal; and when received acoustically propagated signal matches said predefined signal***"; "***means for comparing a content of said acoustically propagated signal with a stored predefined signal content; a human detectable output unit; and means for causing said output unit to generate a predetermined information signal upon detect of a match between said acoustically propagated signal and said predefined signal content, said predetermined information signal***

being on one of visually and audibly detectable form” and “a person wearing a badge while listening to one of cinema, radio and television program material, said badge having an acoustic detector, processor means for processing information received from said acoustic detector, and means for displaying predetermined visual indicators; upon determination by said processor means that said acoustic detector has received predefined acoustic information, said processor means causing said display means to display a predetermined visual indicator associated with said predetermined information”.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Response to Arguments

5. Applicant's arguments with respect to claims 21-35 have been considered but are moot in view of the new ground(s) of rejection.
